

About Us

Individuals are assisted with all their daily living activities to enable them live in the comfort of their home and in proper hygienic condition.

- We provide quality care by ensuring that you are treated with respect and dignity.
- We assure that our clients have enough privacy while under our supervision.

(a) When appropriate, individuals receive community resources such as transportation, shopping, dining at restaurants and part-take in social and recreational activities.

(b) Our DSPs will Support the individual in replacing challenging behaviors with positive, accepted behaviors for home and community environments;

(c) BB in-home support Provides general supports to individual as needed.

(d) DSPs are trained to Monitor the individual's health and physical condition and provide routine and safety supports with medication or other medical needs.

BB In-Home Support services

provide In-Home services for our clients in the comfort of their own homes, family home, or any community settings that typically supplements the primary care provided by the individual's family or other unpaid caregiver to ensure the health, safety and welfare of your loved ones in the comfort of his or her own home or family home.

BB In-Home Support services will ensure that the individual will acquire help with adaptive skills necessary to reside successfully in their own homes and adapt well in the community-based settings.

Philosophy

BB In-Home Support recognizes that the individual is the most important resources in his/her own development, both as the person most directly affected by his/her constraints and limitations, and as recipient of the program. Our empowerment strategy therefore places control in the hands of the individual to claim both his/her rights and responsibilities to develop to his/her full potential.

Our commitment is further reinforced by the philosophy that we work for the individual. Therefore, BB In-Home Support exist to enhance the quality of life of the individuals we serve.
